PARTIAL VIEW OF EXHAUST  
FOR PC. NO. 287376

The SR-2 is a key valve in the "121" Trailer Air Brake System. Generally installed in the required spring brake release reservoir, it is responsible for controlling the application and release of the spring brakes both during emergency situations and normal parking. It protects and isolates the spring brake reservoir, preventing automatic brake application in the event of trailer service system failure. The SR-2 also provides the ability to release the trailer spring brakes at least once subsequent to their application.

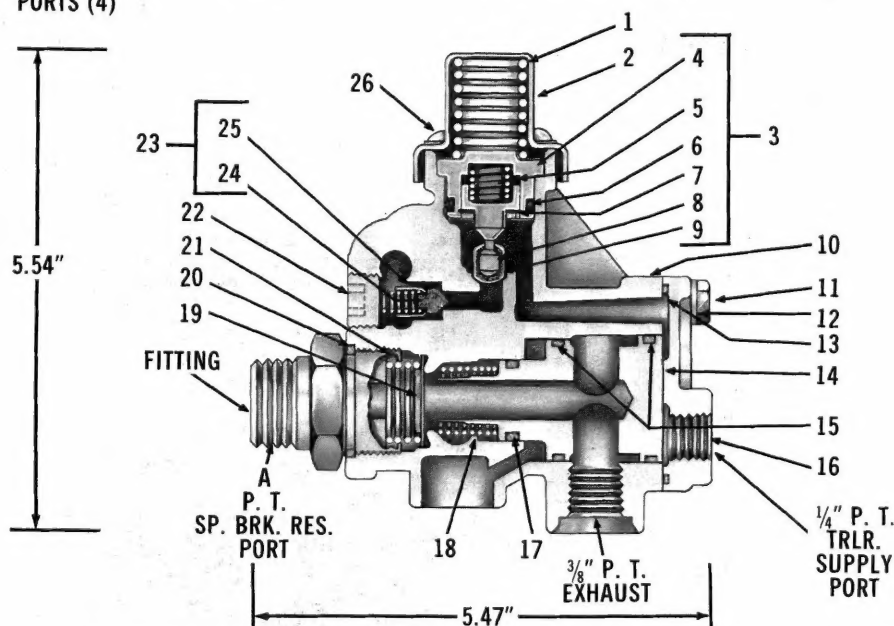

For Service/Maintenance information, see Service Data Sheet SD-03-43.

MAINTENANCE KIT PC. NO. 287691.

WEIGHT - 2.6 LBS.

VMRS NO. IS 13-010-048.

DEVICE CODE IS 4510.
